

Lecture 16

Tuesday April 6th 2026

Final exam is Wednesday May 6th 1:00 - 3:00pm

Project 2 Discussion

- Due the April 24th
- P1: Update the Alarm Clock to make sure that it is not using busy waiting and instead implement semaphores.
- Project will be built on the Pintos VM
- Threads and devices folders in src
- Alarm Clock is the only one needed but you can implement the priority scheduling if you want
- Pintos has the test suite you, all alarm related tests need to pass
- Alarm clock is out of 18pts
